

**Luma KEDER** is a durable and secure mounting system for PVC welded structures. It is manufactured with best welding technologies: radio frequency (high frequency) or hot air. We only use high quality components: PCV rod and PVC coated polyester fabric are made in EU to guarantee exceptional durability and strength of the product.

Area of application: PVC tent halls, marquee tents, clearspan tensile structures, large format banners, caravan camping tents, scaffolding roofings and coverings.

We provide standard keder sizes and finishing:

- 13 mm, 12 mm, 11 mm, 10 mm, 8,5 mm, 7,5 mm
- single or double flaps
- colours: white (opaque, translucent), black
- fabric: 1100 dtex, 2200 dtex (reinforced), low –wick, fire siesistant

We do also provide customized versions on request.

## OFFER
